# Preface

This volume contains proceedings of the International Conference on Language and Technology in the Interdisciplinary Paradigm (LATIP 2021), 1-3 April, 2021, Novosibirsk & Irkutsk, Russia.

The conference aimed to provide an interdisciplinary forum for researchers, practitioners and scholars and discussed linguistic and linguosemiotic aspects of the world languages and new teaching technologies.

The International Conference on Language and Technology in the Interdisciplinary Paradigm (LATIP 2021) is an interdisciplinary discussion platform, which brought together both teachers and researchers. This conference was attended by specialists in the field of linguistics and pedagogy. The geography of the participants covered various regions of Russia and Europe.

These issues were discussed during four plenary sessions:

- Current challenges and opportunities in Learning and Teaching
- Emerging Education Technology
- Problems of modern linguistics No 1

196 abstracts and registration proposals were received and 128 papers presented from 3 countries (Russia, Poland, Portugal) at the conference. Each author was allotted 10 minutes to present their paper, 5 minutes on discussion, and 3 minutes on debates.

Peer review process was managed without use of any specialized software. Web service Antiplagiat.ru was used to detect plagiarism. All papers were subjected through single-blind peer review process by two reviewers. The number of submissions received and reviewed was 196 and 189 qualified submissions were submitted to peer review. 114 manuscripts were accepted after revision indicating an acceptance rate of 58%. Total 28 peers involved in the review process. 9 out of 28 reviewers were invited from outside of the committee. Reviewers had to answer the following questions: 1) Does the contribution fit the scope? 2) Does the contribution feature original research? 3) Are the results and conclusions adequate? 4) Does the presentation style meet academic standards?

We would like to express our gratitude and appreciation to all attendees, contributors for all their great scientific input and for many fruitful discussions and interaction. We also want to honor almost three dozen reviewers for their time and effort contributed to make this volume published. Special thanks goes to editors, chairs and their assistants for tremendous work they have done on handling the correspondence, coordinating peer-review process, proof-reading and copy-editing papers.
