Fiji National University, Suva, Fiji

European Proceedings of International Conference on Education and Educational Psychology (EpICEEPSY) is an open access, peer-reviewed and refereed series. EpICEEPSY dedicated to offer a platform to encourage academics to publish original articles on the current developments in Education and Educational Psychology.

The EpICEEPSY publishes theoretical, experimental or application-based works with the objective of contributing to a greater understanding and development of social and behavioural sciences. EpICEEPSY publishes edited volumes based on the outcomes of conferences.

Once published, all proceedings are submitted for evaluation and possible coverage in **Web of Science Core Collection™ Conference Proceedings Citation Index - Social Sciences & Humanities (CPCI-SSH)**.

Preface

We are pleased to present the proceedings containing selected, peer-reviewed papers from the 14th International Conference on Education and Educational Psychology (ICEEPSY 2023), which was held on 17-19 October, 2023, in Barcelona, Spain.

Having been held for the past thirteen years, ICEEPSY has become a favourite conference choice for many academics from all over the world, many of whom have become part of the ICEEPSY family and look forward to catching up academically and socially during this conference. ICEEPSY 2022 was organized by the Academics Institute in association with a non-profit organisation International Cognitive and Behavioural Psychotherapies Society (CBPis) in Cyprus.

The aim of the ICEEPSY 2023 was to provide a platform for academics, professionals and other stakeholders working in the field of Education and Educational Psychology to present their latest works to an international audience of their peers. As with all previous conferences, the ICEEPSY 2023 was also a venue to establish new networks and renew former ones with like-minded colleagues as a means of promoting more research and thinking in this area.

ICEEPSY 2023 featured presentations by renowned and skilled researchers and international scholars working in the field of educational and educational psychology. This conference brought together students, teachers, researchers, practitioners, and psychologists who are keen in sharing their latest research in teacher education, basic education, basic skills, counselling psychology, adolescent growth and development, educational psychology, continuing education, higher education, quality assurance/institutional effectiveness, learning theories, effective teaching practices, second language teaching, and Arts Education

The detailed programme of the conference and recorded videos of each presentation is available at: <https://www.academics.institute/conference/ICEEPSY/2023>. Following is a brief overview on the ICEEPSY 2023: Four invited academics presented keynote speeches; a workshop was held; two oral presentation sessions were held; twenty two authors from thirteen countries (Canada, Cyprus, Czech Republic, Estonia, Finland, Hungary, Netherlands, Malaysia, and United Kingdom) presented their papers. For presentations, 30 minutes were allocated to each presentation including Q&A session.

Academic Institute's online submission system was used for the submissions and reviewing process. Total forty three submissions have been received for ICEEPSY 2023 and seventeen full-text papers were subjected to a single-blind peer review process by experts in the related field. A total of seventeen scientific committee members and three external reviewers were involved in the review process which was completed in two phases. In the first phase, the submissions were evaluated for content relevance and contribution to the conference themes, while in the second phase, the selected papers were reviewed by two reviewers for content and language accuracy. After this rigorous peer reviewing process, twenty one papers from ten countries were selected for presentation. Papers focus on the following topics: assessment and evaluation, teacher education, basic education, basic skills, counselling psychology, adolescent growth and development, educational psychology, continuing education, higher education, quality assurance/institutional effectiveness, learning theories, effective teaching practices, second language teaching, new approaches in psychology, special education, education and technology, information and communications technology, and distance learning.

We would like to express our sincere gratitude to all the participating presenters, International Scientific Committee and reviewers, and Organizing Committee for helping to make the ICEEPSY 2023 a great success. We would like to state that the success of ICEEPSY 2023 would not have been possible without the diligence and dedication of the organizing committee.

We would also like to take this opportunity to extend an invitation to participate in ICEEPSY 2024, the 15th International Conference on Education & Educational Psychology scheduled to be held in the beautiful city of Madrid, Spain from 04-07 November, 2024. ICEEPSY 2024 will again feature informative workshops and presentations by skilled educational and educational psychology researchers and international scholars. More than 90 countries have been represented in previous ICEEPSY conferences. Also important are the friendships and professional relationships that begin, or are renewed, at ICEEPSY each year.

Hope to see you all there and online!
