European Proceedings of Social and Behavioural Sciences (EpSBS) is an open access, peer-reviewed and refereed series. The main objective of EpSBS is to provide an intellectual platform for the international scholars. EpSBS aims to promote interdisciplinary studies in social and behavioural sciences and become the leading series in social and behavioural sciences in the world.

Topics include anthropology, archaeology, psychology, sociology, philosophy, interdisciplinary humanities, economics, political science and additional entries in related fields, including education, environmental studies and media. The series also welcomes works showing connections between human activities and social interactions.

The EpSBS publishes theoretical, experimental or application-based works with the objective of contributing to a greater understanding and development of social and behavioural sciences. EpSBS publishes either monographs for example, master thesis/doctoral dissertations or edited volumes based on the outcomes of conferences.

Once published, all proceedings are submitted for evaluation and possible coverage in **Web of Science Conference Proceedings Citation Index - Social Sciences & Humanities (CPCI-SSH)**.

Preface

The volume contains proceedings of 4th International Scientific Conference "Competitiveness and the development of socio-economic systems" dedicated to Alexander Tatarkin. It was held 25-26 November 2020 in Chelyabinsk State University, Chelyabinsk, Russia.

The conference's objective was to discuss topical issues related to the explanation and management of the development processes and increase the competitiveness of socio-economic systems of various levels. Particular attention is paid to improving economic theory and economic education in response to modern challenges, sustainable development of regions, technological drivers of socio-economic transformations, the introduction of new technologies into the production system. Today, the competitiveness of both national and regional socio-economic systems, ensuring their sustainable development in the face of new challenges that change the game's rules, has acquired particular importance. Active discussions continued on responses to such challenges, including digitalization and introducing new technologies in production, urbanization and decentralization of financial systems, the growing role of media in socio-economic processes, and previous experience's positive use. The fundamental problems of the development of economic theory and economic education, the choice of their methodological and conceptual basis for forming an adequate perception of the complex modern socio-economic reality remain unresolved. Several problems discussed became relevant in the 2020 pandemic, and some reports were related to the crisis-overcoming drivers.

The conference includes a keynote speech presented by the corresponding member of the Russian Academy of Sciences, Vice-President of Free Economic Society of Russia and the Scientific Director of Institute of Economics of RAS, Doctor of Economics, Professor Ruslan Grinberg. The plenary session includes seven reports on topical issues presented by well-known researchers from Russia, Vietnam, and the Czech Republic. Particular attention is paid to post-pandemic social and economic development and economic digitalization issues. After the plenary, discussions were continued in nine thematical sessions, including: Economic theory and economic education in the modern world, Development and self-development of socio-economic systems: world and national economy, Development and self-development of the region, Development and self-development of municipalities, The efficiency of an industrial enterprise in the modern world, Social development of a country, region and person, Media communications and media technologies as drivers of the development of socio-economic systems, Digital transformation of education and employment as a challenge to the competitiveness of the socio-economic system, World experience in the development of socio-economic systems. Also, the conference includes the workshop by Prof. Wadim Strielkowski (Present and future of the renewable energy economy in Russia and in the world), and two round tables: "Synergy of the development of socio-economic systems and scientific research in Russia and Vietnam" and "Scientific heritage of Academician Alexander Tatarkin." The applications, abstract, and papers were submitted via conference official e-mail (ieo-konf@csu.ru), and then distributed to reviewers. After receiving the answers from reviewers, Organising Committee informed authors about inclusion (or not) of their presentations in the conference program. Three hundred seventeen four abstracts are submitted to the conference. Two hundred sixty-five reports and abstracts are accepted for the oral presentation at the conference, and one hundred thirty full-text papers are accepted for publications in this volume. The plenary presentation timeline was 20 minutes for speech and 10 minutes for questions and answers, and parallel session speeches were 15+5 minutes, respectively. Participants make the online oral presentations using MS Teams platform due to the pandemic

limitations. The participants present Universities and scientific organizations from Russia, Vietnam, Iran, China, Romania, Czech Republic, Mongolia, Italy, Ivory Coast, Chad, New Zealand, Japan, Bulgaria, Belarus, Kazakhstan.

The review process used for language and plagiarism checking the Grammarly Premium software, and for Plagiarism checking, in addition, the Antiplagiat system. The papers were reviewed through a double-blind review process. The Organizing Committee received 185 full papers, and 178 papers were sent for review. After the review procedure, 130 papers are accepted for publication. The acceptance rate is 0.703. The Organizing Committee used more than 30 reviewers in the reviewing process, including program committee members and external experts.

The Organizing Committee thanks all participants, keynote and plenary speakers, reviewers, and technical support team in Chelyabinsk State University, who make our conference possible during the pandemic. The special thanks we will say to the Russian Foundation for Basic Research and Chelyabinsk State University who sponsored the CDSES-2020 Conference, and to the Institute of Economics of the Ural Branch of Russian Academy of Sciences, Free Economic Society of Russia, Graduate Academy of Social Sciences (Vietnam), and Allameh Tabataba'i University (Iran), who were the co-organizers.
