European Proceedings of Social and Behavioural Sciences (EpSBS) is an open access, peer-reviewed and refereed series. The main objective of the EpSBS is to promote interdisciplinary studies in social and behavioural sciences by providing a platform for international scholars to disseminate their work.

Topics include but are not limited to anthropology, archaeology, psychology, sociology, philosophy, interdisciplinary humanities, economics, political science and additional entries in related fields, including education, legal studies, environmental studies and media studies. The series also welcomes works highlighting the connection between human activities and social interactions.

The EpSBS publishes theoretical, experimental or application-based works with the objective of contributing to a greater understanding and development of social and behavioural sciences. EpSBS publishes either monographs for example, master thesis/doctoral dissertations or edited volumes based on the outcomes of conferences.

Once published, all proceedings are submitted for evaluation and possible coverage in **Web of Science Core Collection™ Conference Proceedings Citation Index - Social Sciences & Humanities (CPCI-SSH)**.

Preface

The volume contains proceedings of Conference Land Economy and Rural Studies Essentials. The conference was held on 17 – 18 August 2020 in Omsk, Russia.

The objective of the conference is to discuss actual social, economic and political problems of the development of rural areas and communities. Here we consider the human capital as the main resource for implementation of modern innovative agriculture. The most significant share of reported studies are devoted specifically to the topics of accumulating human capital in rural areas.

Importance of the conference is in systematic discussion of the means to develop human capital in rural areas while the urbanization trend persists. This issue is considered as most value to promote the sustainable development of agriculture in the future.

Scope and overview of the conference are discussed further. LEASECON 2020 appeared to be both stimulating and informative with a wonderful array of keynote and guests from all parts of Russia and also from Mongolia, and Kazakhstan. Delegates had a wide range of meetings to attend, some of those were with the opportunity of virtual participation via Zoom. There were 4 thematic sessions, each had its own keynote speaker who delivered their speeches at the end of the first day. The main sessions of the event were:

- Studies of Rural Societies, Rural Policies and Rural Environments
- Cultural, Legal and Social Factors Impacting Rural Life and Real Estates
- Training of Human Resources for Agribusiness and Rural Management
- Scientometrics, public services, and management is science
- Technology Investments and Innovations Management in Farms and Rural Business Units
- Environmental, Economical and Resource Management Challenges of Land Utilization
- Economy of Rural Enterprises and Industrial Development
- National Economy, Public Services and Social Problems

In addition to thematic sessions, two plenary sessions were held. Both plenary sessions consisted of two plenary lectures 30 minutes each and a word from organizers. All regular reports, including keynotes, were limited to 10 minutes followed by 10 minutes of questions and answers. The program consists not only of plenary and thematic sessions but also workshops and panels. Three best paper awards were introduced for the following reports:

- “New approaches to human capital formation in rural areas under present-day conditions” by Evgeniya V. Sokolova;
- “Socio-economic situation and political orientations of the rural population” by Nina Skosyreva;
- “The digitalization of agriculture: infrastructure and human resources” by Oksana V. Shumakova.

Peer review process was managed without the use of any specialized software. Web service Antiplagiat.ru was applied to detect the plagiarism at the initial check. All papers that were previously published, non-original or not relevant to the scope were declined. All other manuscripts were submitted to single-blind peer review by two referees. Every referee was engaged at most at 25 reviews. Overall, 141 of 188 received

submissions gone through the review process. After the review 112 papers were accepted. Acceptance rate is 60%.

The conference committee express their sincere appreciation to all the organizing institutions and involved parties. Special thanks are due to keynote speakers who made the valuable contribution to the discussion. We also want to honor several dozen reviewers, translators, editors, copyeditors and publishers who contributed a lot of time and effort to make this volume complete and published.
